# EMERGENCY NURSING SERVICES

Emergency nursing services shall be made available in the District in accordance with state law, and District policies and procedures. The objective of emergency nursing services is the maintenance of the physical, mental and emotional health of the students while they are at school or participating in school sponsored activities.

In providing emergency nursing services, the District shall:

1. Arrange for a qualified physician to serve as District medical advisor for emergency nursing services. The medical advisor will coordinate with the school nurse to review the policies and procedures and advise the District regarding health services.

2. Ensure that emergency nursing services policies are provided under the direction of a professional nurse(s) registered in Wisconsin. The safety committee with support from the Administration and county health department will annually review the emergency nursing policies and update as needed.

3. Ensure that protocols are in place for dealing with student accidental injury and illness, the handling and administering of medication and the recording of accidents/incidents and services provided. This includes all school-sponsored activities including but not limited to field trips, curricular, co-curricular and extra-curricular activities.

4. Provide at each school a designated health area with appropriate and adequate equipment, supplies and space for implementing emergency nursing services. Emergency information cards shall be on file in the school office for all students.
