Equine

ALIVE™

“Nutritional support
for the metabolically-
challenged horse.”

Why **Equine ALIVE™**?

Featuring...

Advanced Technologies

- Highly digestible and consistent protein source.
- Aid in development and growth.
- Enhance palatability.
- Support the body's immune system.
- Strengthen keratin structure for sound hooves.
- Support the reproductive system for mares and stallions and mares' milk quality
- Support normal development and bone formation in foals.
- Help maintain proper pH in digestive tract.
- Help achieve Full Genetic Potential.
- Optimize performance of recreational horses.
- Support exercise tolerance.
- Support normal digestive function during training, travelling and performance.
- Enhance nutrient absorption and fiber digestion.

Why are your horses failing to achieve their Full Genetic Potential?

Perhaps they're suffering from:

- Consequences of day-to-day lifestyle.
- The demands we ask of our horses.
- Health conditions.
- Stressful environments.
- Unbalanced diet.
- Genetically predisposed conditions.

Feeding Directions

For metabolically-challenged horses of all ages.

ENHANCED LEVEL:

Feed horses 4 ounces per head per day per 1,000 pounds of bodyweight.

MAINTENANCE LEVEL:

Feed horses 2 ounces per head per day per 1,000 pounds of bodyweight.

For customized feeding recommendations, consult with Spirit Plus Nutrition and Health.

Inulin prebiotic, non-digestible fiber, FOS, stimulates the growth of advantageous bacteria in the gut.

Colostrum provides functional proteins and growth factors for nutritional support as well as digestive health support.

Let us help you bring your Equine **ALIVE** and achieve their Full Genetic Potential!
